2 **Wear the neckloop**

Hang the neckloop around the neck as shown in image to the right.
Hang Neckloop
around your neck

3 **Test and use neckloop**

Once connected to mobile phone you should be able to hear any audio with your earpieces (Please check how to use earpiece in manual for earpiece). The volume can be adjusted via the volume control on the neckloop.

The Bluetooth neckloop has a number of buttons all providing different functions. See below for detailed descriptions:

1.
38db microphone ensures you partner can hear you clearly even you are whisper to the microphone.

2. Exclusive design – Mute Button
The creative function for avoid earpiece detection.

Simply push mute button it will cut off audio output and earpiece detection equipment will be unable to pick up any signals from neckloop.

Works in phone conversation and in music player mode. Push Mute button again and you are back to phone conversation.

3. Change volume to get clear sound.

4. Exclusive design – SOS Button
Contact your partner without saying a word.

Simply push SOS button to transmit a beep. Ideal for transmitting morse code.
You can hear the beep sound i in your earpiece.

5. Bluetooth switch - multiple function switch to turn on/off power, reject/answer/make a phone call etc.

4 **Power, Battery and recharge**

To save battery power, please turn off Bluetooth power if not using for a long period.

Turn off – Press and hold Bluetooth switch until indicator flash then switches off
Turn on — Press and hold Bluetooth switch until indicator turn Blue. If already paired with mobile phone and Bluetooth function in mobile phone is turned on, it will connect to mobile phone automatically.
* Some mobile phone models do not support this function.

The neckloop has build-in 320mah lithium rechargeable battery. The full performance of a new battery is achieved only after two or three complete charging and discharging cycles. The battery can be charged and discharged hundred of times, but it will eventually wear out.

When recharge battery use only original default USB recharge cable and default wall charger. Do not leave a full charged device on recharge power source. Overcharging may shorten battery life. If left unused, a full charged battery will loss its charge over time.

We supply US/EU standard plugs for the wall charger. Please choose correct plug while placing the order.

Flash Blue and Red	In pairing mode
10 rapid flashes in Blue	Pairing Successful
Slow pulse in Blue	Connected

■ Troubleshotting

Q. Why the neckloop does not work with my phone?
A. Please make sure the Bluetooth is switched on in your mobile phone and that the neckloop is in pairing mode. Also mobile phone needs to be within 10 meters from Bluetooth neckloop in open space. Restart the phone and neckloop and try again.

Q. Why do the answer SOS and mute buttons not function?
A. Both of SOS and mute functions only work whilst phone conversation is in progress. If you are playing music or mobile phone not in phone conversation, there 2 functions are not applicable.

Q. How to recharge battery?
A. Please read "Power, Battery and Rechage" step #4 for detailed instructions. When you have successfully connected the neckloop to a power source the indicator will change to red.

Q. Why do I hear interference in invisible earpiece?
A. If earpiece has no quality problem, the volume is likely too loud. Reduce the volume on the volume controler.
