

# Android phone USB Camera Setup Manual

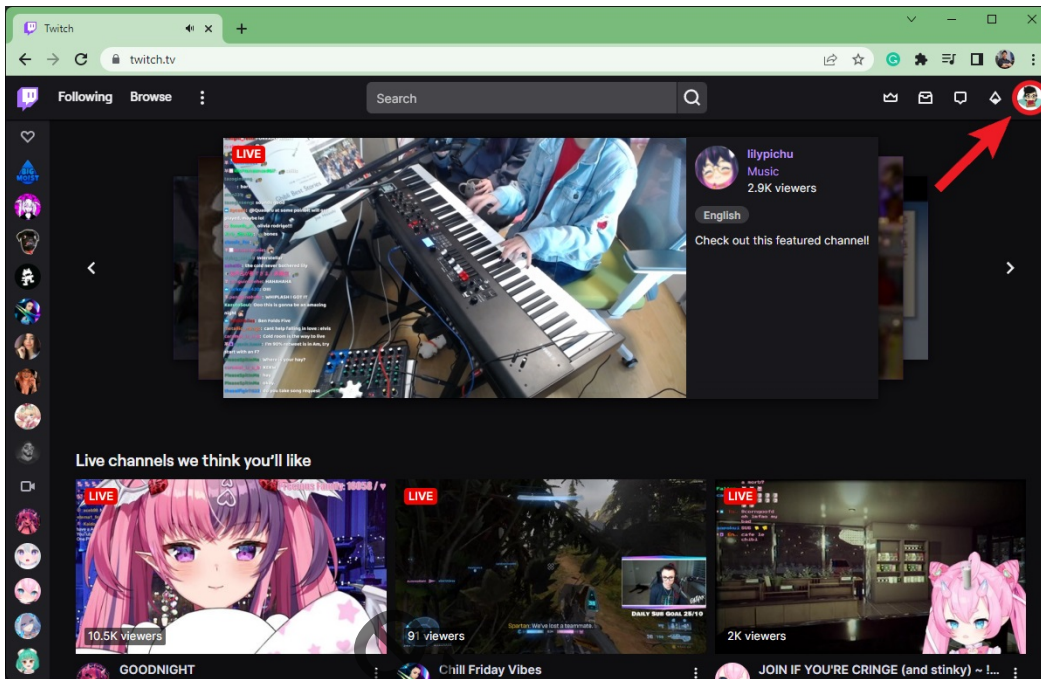

*If the camera video becomes blurry just point the camera at any text and watch video on the phone, then slowly turn the button ccw or cw till the camera video will become sharp and clear*

**Open account in your COMPUTER Browser on twitch.tv**

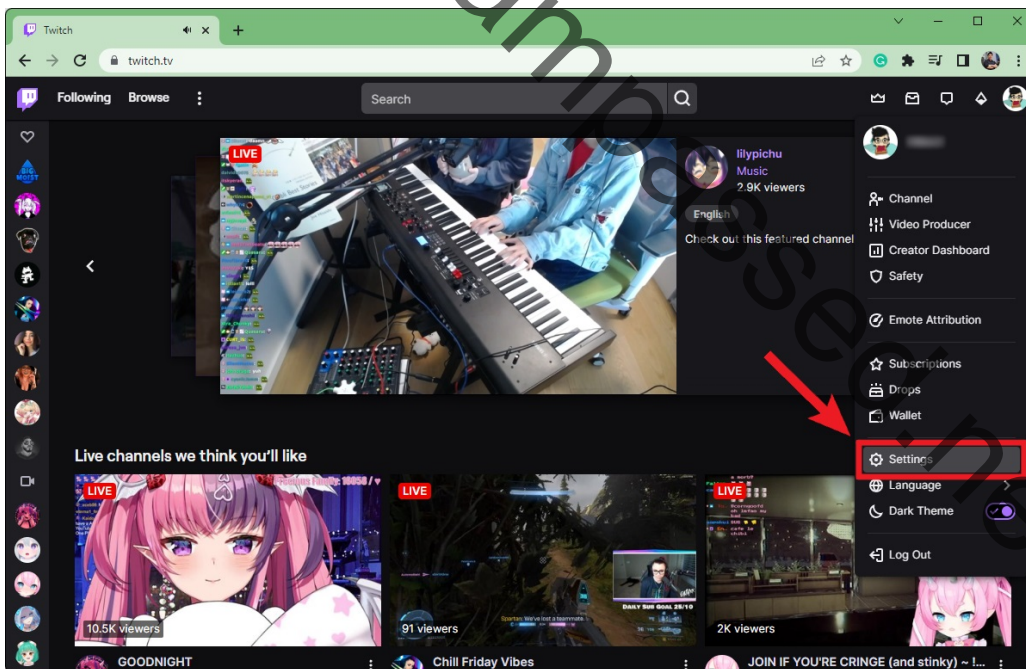

**How to find your Twitch stream key.**

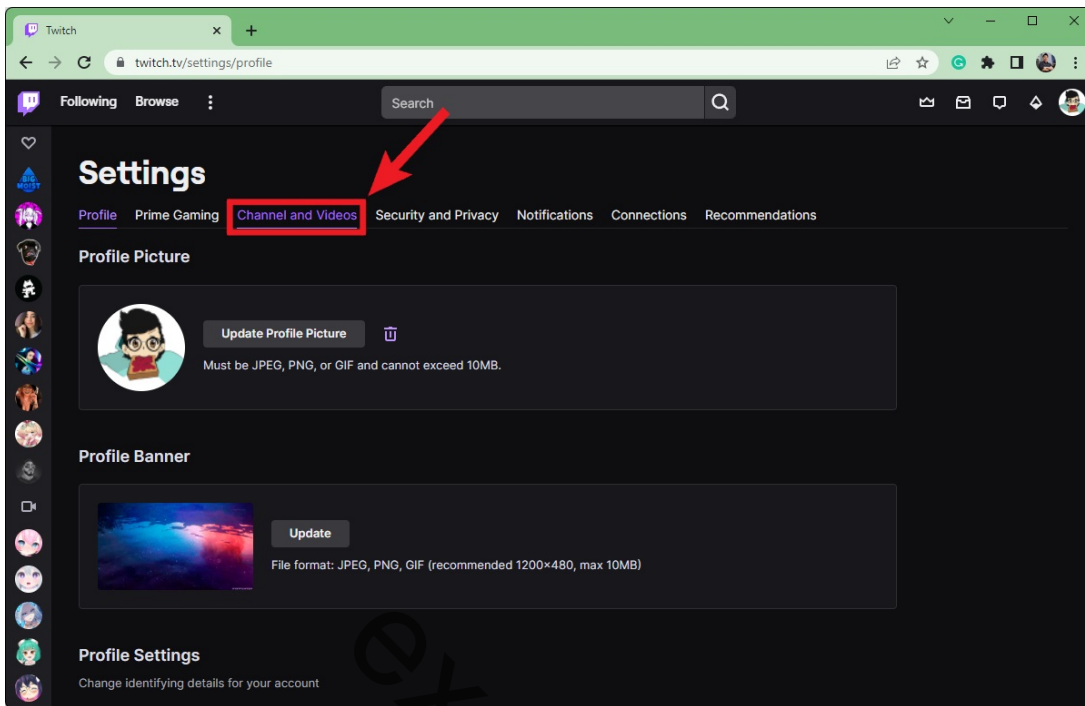

Go to the [twitch.tv](https://www.twitch.tv) website in your browser on your COMPUTER. Click the profile picture icon in the top right of the interface.

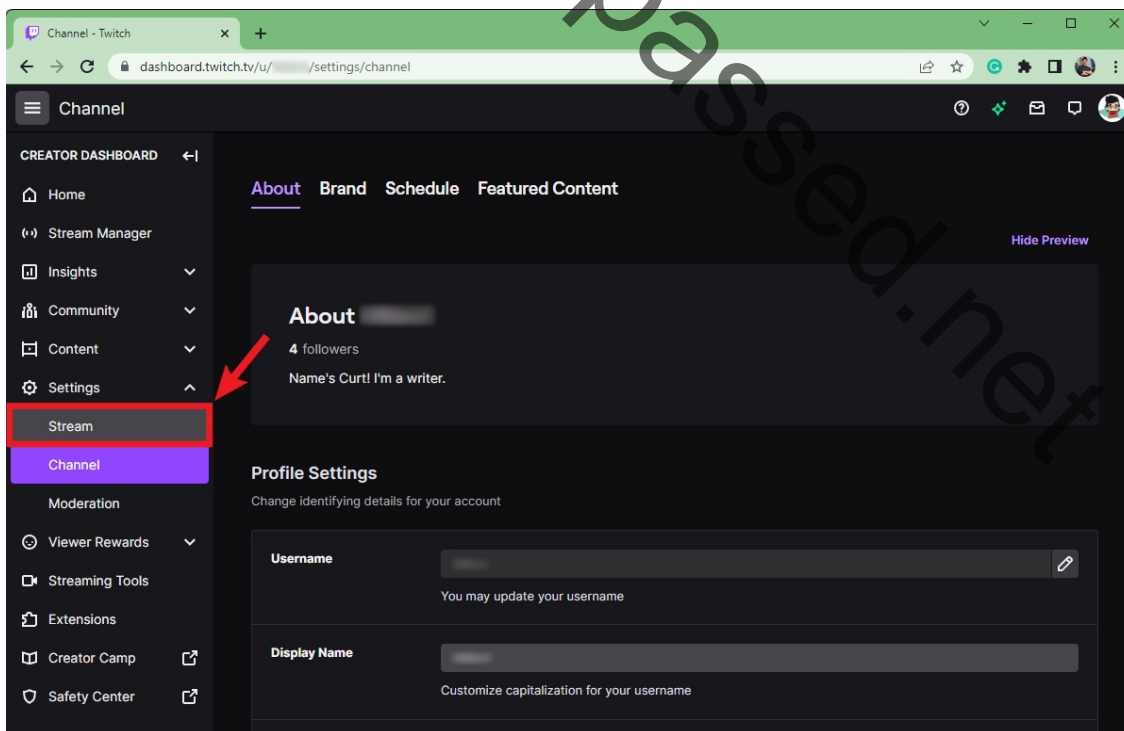

From the subsequent dropdown menu, click the cog-shaped **Settings** button.

Within Settings, click on the tab marked **Channel and Videos**.

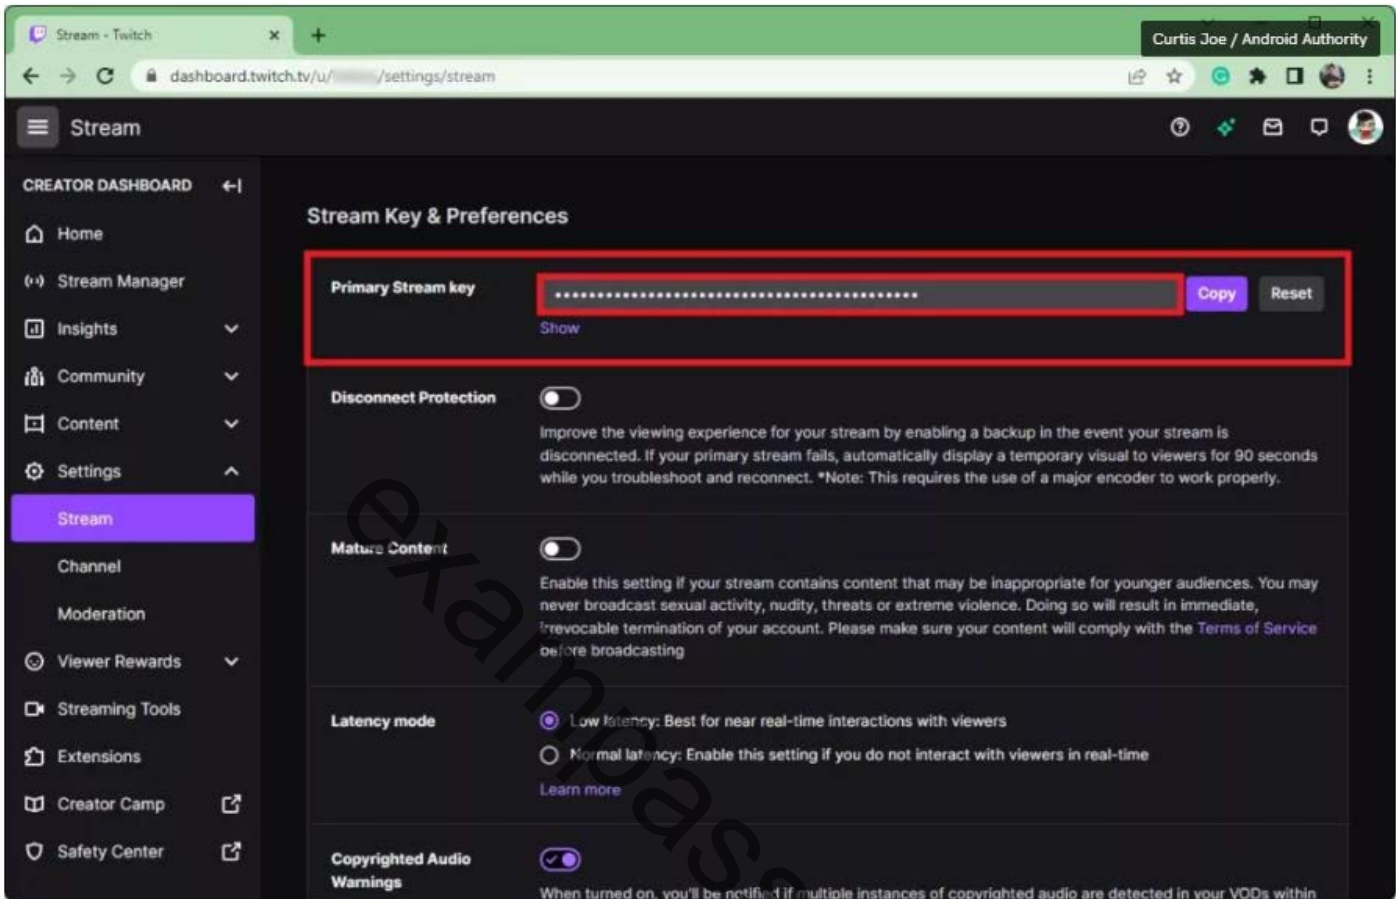

This will take you to the Channel section of the CREATOR DASHBOARD. In the menu on the left, make sure the **Settings** dropdown is open, then click **Stream**.

The first section that appears on the right will be **Stream Key & Preferences**. Your Twitch stream key appears next to the **Primary Stream key** box.

- Click **Show** if you just want to view your Twitch stream key.
- Click the **Copy** button if you wish to copy your entire Twitch stream key to your clipboard. You can then paste this into OBS, Streamlabs, or your streaming software of choice to begin streaming to your Twitch account.

**Install on your Android phone which you will use with USB Camera paid application USB CAMERA PRO.**

**It has \$5.49 USD or \$7.49 CAD one time lifetime fee.**

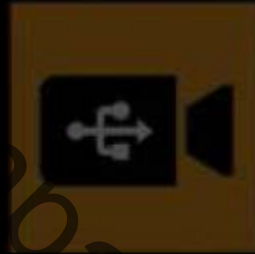

USB Camera Pro  
沈堯 / ShenYao China  
3.4 ★ \$5.49

**Install on your  
Android phone APK  
USB Camera Pro  
from Play Store  
and open it**

Please connect a USB WebCam, Easycap or UVC video grabber device or USB Audio input device

⚠The USB cable between the devices should not exceed 1 meter. Please consider adding a USB hub between the devices if exceeds 1 meter to ensure the stability of USB transmission

## RTMP Format

H.264 + AAC

HEVC over RTMP is based on enhanced RTMP spec <https://github.com/veovera/enhanced-rtmp>, available for YouTube Live currently.

## Encoder Settings

H.264 & HEVC

### RTMP/SRT Push URL

rtmp://live.twitch.tv/app/

ENTER THIS URL

### RTMP Stream name/key (if have)

live\_905908198\_mBlzLtQklMoiwlvBlzLtQklMoiwlv Z

c **COPY/ PASTE the Stream key from your Twitch.tv account**

## RTMP/SRT Settings Manager

Manage or re-use the previous RTMP/SRT Push URL and video stream key

## UPnP

Turn on UPnP to enable port forwarding

## Title

Live Video from SM-S918U1

Scroll down in Settings to these 2 lines

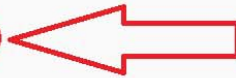

You can email this key from your computer to yourself and then open this email on your android phone. And then copy paste to the application

# Settings

**General Settings**

Physical button settings

Custom App Title

USB Camera Pro

Video View Aspect Ratio

Fit

VR/Cardboard View

Display Audio Indicator

Display FPS

4GB file size limit

Some filesystem has 4GB file size limit (e.g. FAT32), enable this option to auto-segment recording file into 3.5GB

Loop Recording

Set auto-segment, auto-delete or space limit.

Save to SD Card/USB Disk

Go Back all the way up in Settings and click on GENERAL SETTINGS

Exampassed.net

better compatibility, but the PIP window does not support zooming

**ENABLE THESE SETTINGS**

**Full screen when startup**

**Display Video On Lockscreen**

**Wake up Screen after connected**

**Turn Motion Detection after connec..**

**Auto-record after connected**

Record Delay (second)  
0

**Start RTMP/SRT pushing after con..**

You should provide a RTMP/SRT push url and RTMP Stream name/key (If have) before turning on this option

**Start IP Camera Server after conne..**

**Start RTSP Server after connected**

**Start Service when system start up**

**Startup Delay (second)**

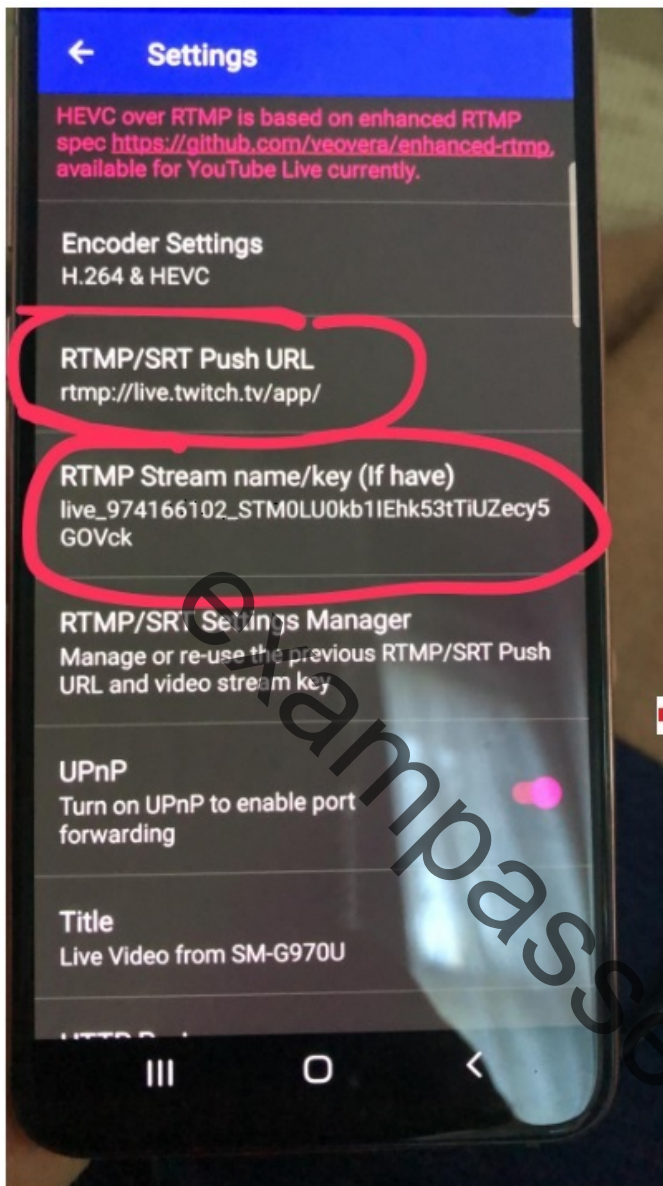

When **USB CAMERA PRO** configured correctly if you will see

**Live Pushing** in the top left corner

Go to your [twitch.tv/youraccount](https://www.twitch.tv/youraccount) name and watch live video

**LIVE VIDEO  
COULD BE  
WATCHED IN  
ANY INTERNET  
BROWSER ON  
MAC or PC or on  
any smarthone.**

exampassed.net

It you did everything correct and USB CAMERA PRO APP does not work

**CHECK FOR**  
EMPTY spaces before RTMP/SRT Push URL or RTMP stream key.

RTMP/SRT Push URL  
rtmp://live.twitch.tv/app/

RTMP Stream name/key (If have)  
live\_974166102\_STM0LU0kb1IEhk53tTIUZecy5GOVck

Highlight URL or STREAM KEY and delete unnecessary empty space. You should be good now.

Share this link with your assistant so she/he can see your camera live broadcast: [twitch.tv/your account name](https://www.twitch.tv/your-account-name) Best viewing experience is on a laptop or a large monitor of a desktop PC.

# Where to put phone

The best location is here.

You can make internal pocket for the phone with 2 small holes for the cables.

The tight pocket could be glued with a glue gun to a tight t-shirt
